1. The following is an examiner's statement of reasons for allowance: as discussed in the specification in paragraphs [004-006], prior art templates are known that are flimsy/flexible that more or less conform to the surface being drilled. Rigid templates are also known, but these are generally linear, or like the Garcia reference at 17, have a seal on the underside which also more or less conforms to the surface being drilled. In certain circumstances, "more or less" conformance isn't good enough. While the language used in each claim varies slightly, independent claims 1, 7, and 20 have been amended to set forth a product by process limitation by which the contact surface of the drill template is manufactured directly from the computer definition/data files/geometry of the workpiece, such that the contact surface will conform exactly with the shape of the workpiece. See claim 1, lines 6-7, claim 7, lines 7-9, and claim 20, lines 9-12. There is no suggestion in the prior art to use the computer definition/data files/geometry of the workpiece to make the shape of the template such that it has an exact fit on the workpiece.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-14 and 16-20 are allowed.

In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office actions directly into the Group at FAX number to 571-273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account.
